Allowable Subject Matter

7. The following is an examiner's statement of reasons for allowance: Claims 1-3, 6, 7, 9-14, 16-19, 22, 24-27, 29-33, and 35-39 are allowed. Prior art of record does not teach a method of partitioning a large programmable logic array (PLA) for controlling a power consumption of PLA by determining an **optimum splitting variable for dividing** PLA into at least two sub-PLAs by **avoiding unbalanced** columns in an AND plane of a set of equations representing the PLA, and **selecting a column with smallest overhead** in the AND plane of the set of equations representing the PLA, wherein a first sub-PLA of the at least two sub-PLAs includes products in which the splitting variable is in complemented form, a second sub-PLA includes products in which the splitting variable is in uncomplemented form and the splitting variable corresponding to a specific input, output and product in the set of equations representing the PLA; dividing the set of equations representing the PLA into a first set of equations representing the first sub-PLA and a second set of equations representing the second sub-PLA based on the splitting variable as claimed.

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
